Java

```java
class Solution {
    public boolean doesAliceWin(String s) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string} s
 * @return {boolean}
 */
var doesAliceWin = function(s) {

};
```

TypeScript

```typescript
function doesAliceWin(s: string): boolean {

};
```

C++

```cpp
class Solution {
public:
```

```
    bool doesAliceWin(string s) {

    }
};
```

C#

```
public class Solution {
    public bool DoesAliceWin(string s) {

    }
}
```

Kotlin

```
class Solution {
    fun doesAliceWin(s: String): Boolean {

    }
}
```

Go

```
func doesAliceWin(s string) bool {

}
```
